RANGE OVERVIEW FROM COMPLETE TO COMPONENTS

DMF SEGMENT

Fullpack DMF

- Complete all-in-1-solution, all in one box
- Everything from a single source, from an OE supplier, precision-tuned to work perfectly together
- Simplifies parts selection, reduced installation time

Flywheel

- From an OE supplier: Valeo DMF, the most advanced vibration filtration technology

Conversion kit - KIT4P

- An innovative Valeo alternative (LCV, Taxi's etc.) for intensive usages
- The rigid flywheel is guaranteed for 1.000.000 kms!

DUAL CLUTCH SEGMENT

DDC (Dual Dry Clutch) & DWC (Dual Wet Clutch)

- Smart O.E Transmission System technologies for outstanding responsiveness and comfort Workshop efficiency: All in one box
- CO2 emissions reduction: lower vibration and resistance. Smoother gear shifts

TRADITIONAL CLUTCHES

KIT3P WITH CSC

- All parts precision-tuned to work perfectly together and proven via mass production from an OE supplier
- Smart solution of clutch kits with CSC to ease the workshop replacement of the parts

Traditional kits

- All parts are precision-tuned to work perfectly together and proven via mass production from an OE supplier
- Including self adjusting clutches: SAT (Self Adjusting Technology) and HEC (High Efficiency Clutch) which does not require a special tool, which facilitates the fitting operations.

HYDRAULICS

Hydraulics

- The OE Hydraulics expert on the market with the largest hydraulic range for transmission available in independent aftermarketLeading coverage (above 90% coverage) in all 3 products: CMC, CRC and CSC
